

PUBLIC NOTICE
For
Air Quality Operating Permit
for the Gobernador/Manzanares Compressor Station of Enterprise Field Services, LLC

Enterprise Field Services, LLC at PO Box 4324, Houston, TX 77210-4324 has submitted an air quality operating permit application to the New Mexico Environment Department (NMED) for an air quality operating permit for its Gobernador/Manzanares Compressor Station. The owner of this plant is Enterprise Products Operating, LLC. The exact location of the Gobernador site is at latitude 36 deg., 46 min., 28.2 sec. and longitude -107 deg., 37 min., 3.9 sec. The exact location of the Manzanares site is at latitude 36 deg., 44 min., 52.3 sec. and longitude -107 deg., 40 min., and 32.1 sec. To aid in locating this facility, use the following driving directions: from Navajo City, travel north on NM-539 toward the Navajo Lake Dam for approximately 3 miles, turn east for 0.3 miles to the Gobernador site. The Manzanares site is located approximately 3.7 miles to the southwest. These facilities are located approximately 9 miles east-northeast of Blanco, New Mexico. The Manzanares site is in San Juan County, and the Gobernador site is in Rio Arriba County. The two sites are considered a single source under the provisions of Prevention of Significant Deterioration (PSD). This application file has been assigned an Operating Permit Number P003R3 and TEMPO Agency Interest ID No. 989.

The plant received an air quality construction permit and is in operation. The main purpose of the plant is to compress field natural gas through underground pipelines using reciprocating natural gas-fired compressor engines.

This operating permit application is for a permit renewal. Per 20.2.70.401.C.(4) NMAC, this permitting action involves incorporation of applicable requirements from NSR Permit PSD – 0742M5.

The emissions as established in NSR Permit PSD – 0742M5 and brought forward into this permit are as follows. Parentheses note changes in emissions from previous operating permit action – P003-R2; emissions are expressed in tons per year (tpy). Total air pollutant emissions to the atmosphere are estimated to be approximately Nitrogen Oxides (NO_x expressed as NO₂) at 230.3 tons per year (tpy) (-76.7); Carbon Monoxide (CO) at 386.9 tpy (-128.9); Volatile Organic Compounds (VOC) at 145.1 tpy (+63.5); Sulfur Dioxide (SO₂) at 7.3 tpy (+7.3); Total Suspended Particulates (TSP) at 4.9 tpy (+4.9); Particulate Matter less than 10 microns (PM₁₀) at 4.9 tpy (-9.1); Particulate Matter less than 2.5 microns (PM_{2.5}) at 4.9 tpy (+4.9); Formaldehyde (a Hazardous Air Pollutant, HAP) at 26.1 tpy (-12.9); and Total HAPs at 38.3 tpy (-13.5). The HAPs are included in the VOC total. These emission estimates could change slightly during the course of the Department's review of the application.

The NMED has conducted a preliminary review of the information submitted with the permit application. This review included evaluation of the emission rates and applicable requirements to determine compliance status.

Based on the applicant's analysis, a preliminary determination is that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 1.116, 61,

70, 71, 72, 73, and 74; 40 CFR 50; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality operating permit on or before July 15, 2012.

Interested persons may obtain the draft operating permit, submit written comments, or request a public hearing on Operating Permit Number P003R3. Contact the New Mexico Environment Department, Air Quality Bureau, Operating Permit Unit, 1301 Siler Rd, Bldg B, Santa Fe, New Mexico 87507-3113.

Written requests for public hearing must state the nature of the issues proposed to be raised in the hearing. Comments must be based on the requirements of the applicable state and federal air quality regulations and the Clean Air Act. Comments or hearing requests must be received within 30 days after the public notice is published.

The permit application, draft permit and relevant supporting materials are currently available for review at the Air Quality Bureau, Operating Permits Unit, 1301 Siler, Bldg B, Santa Fe, New Mexico 87507-3113. The Department contact in Santa Fe is Coleman Smith at 505-476-5550.
